Ultimate Advantage

Both textile and paper printing is available with a single printer unit.

Brand-new Hybrid Digital Textile Printer

Tx300P-1800 MkII

Ultimate Printer playing two roles in one, available for both textile and paper

Tx300P-1800 from Mimaki splendidly reproduces rich color gradation and delicate sophisticated lines in textile printing. In Tx300P-1800 MkII, these capabilities have been taken to a new level, and long-awaited print on paper is now available with the "hybrid ink capability" which is another unique feature of this series.

As Dye sublimation ink (transfer) for printing on transfer paper has been added, you can now select from 3 types of ink sets; "Dye sublimation ink (transfer) + Textile pigment ink", "Dye sublimation ink (transfer) + Direct sublimation ink", "Direct sublimation ink + Textile pigment ink".

Enabling print on paper will expand the possibilities of new materials and applications drastically.

*: It is possible to load only one ink as with conventional models.

(The image shows a condition of print on paper.)

Hybrid

Hybrid ink set
(Two types of inks can be loaded at the same time.)

- ▮ Able to manage to use **two types of ink** properly in response to your needs.
- ▮ Available to print on **both paper and textile** with a single printer unit.
- ▮ Possible to create printed fabric simply **with your existing processing equipment** only such as heat press etc.

One way and Hybrid are available.

One way

One way ink set (1 type of ink is loaded)

Versatile use and ink type for direct printing in accordance with material and purpose.

Four colors for high productivity
Six/seven/eight colors for superior expressiveness.

Rich variety of ink types in One way for any printing application

Ink type	Color	Feature	Media(Textile)	Pre-treatment	Post-treatment	Application example
Direct sublimation Sb420	Bl, M, Y, K, LbI, Lm	Ink for direct sublimation print. It allows to print directly onto textile.*1	Polyester	Necessary	Heating / Washing	Soft sign / Sports apparel / Fashion apparel
Disperse dye DD400	C, M, Y, K, R, Violet, Pink, Gray	High color fastness is achieved by dispersing dye particles in water with dispersant and heating at a high temperature to fix the color.	Polyester / Nylon	Necessary	Steaming (heat + water) / Pressure treatment / Washing	Industrial textile / Home fabrics / High-class apparel
Textile pigment TP400	C, M, Y, K, R, Bl, Lk	Ink containing binder (bonding agent) to fix the pigment to fibers by applying heat. As this ink requires only the heat-fixing process after print, the post-process equipment can be simplified.*1,2	Cotton / Hemp / Other textiles**1		Heating	Apparel / Home fabrics / Fashion articles
Reactive dye Rc400, Rc500	C, M, Y, K, Lk, R, Bl, Or	It provides excellent color development and color reproducibility. Combination of dyestuff molecules and fibers delivers superior water resistance, scratch resistance, and light resistance.	Cotton / Hemp / Silk / Rayon	Necessary	Steaming (heat + water) / Washing	Apparel / Home fabrics
Acid dye Ac400	C, M, Y, K, Lk, R, Bl, Or	Property of acid is utilized to vividly dye animal-based materials such as wool, leather and silk as well as nylon and other protein-based man-made fibers.	Wool / Leather / Silk / Nylon	Necessary	Steaming (heat + water) / Washing	Apparel / Home fabrics

*1: Post-processing such as steaming and washing may be necessary depending on the print conditions.

*2: Beautiful results can be achieved even in high-density color print by performing pre-processing.

*3: It is available to print other textiles than cotton / hemp with pre-treatment. Be sure to make a test print in advance.

Print speed

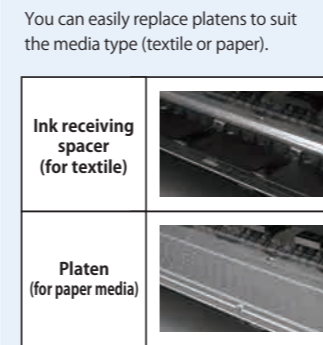

Reactive dye Rc400/Rc500

Only 8 color ink set is available for reactive dye Rc400/Rc500.

Mimaki's print technologies

Mimaki Advanced Pass System 4 (MAPS4) reduces banding

Mimaki's unique anti-banding technique MAPS4* is an advanced version of MAPS3. To prevent banding, swath boundaries are overprinted, whereas boundaries prone to banding are printed with fewer ink droplets.

*MAPS4: Mimaki Advanced Pass System 4

■ MAPS : ON ■ MAPS : OFF

Superior inkjet technology

Mimaki's superior inkjet technology accurately places the ink droplets without losing their perfect circularity. This ensures that texts, lines, and edges are clearly and sharply printed.

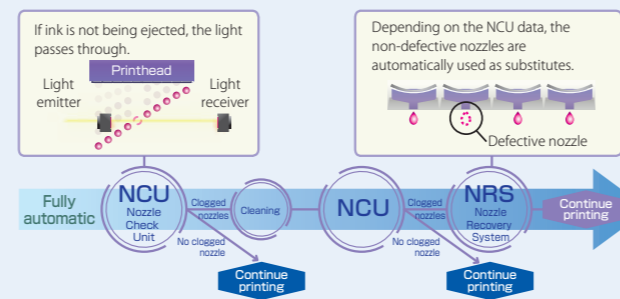

■ No waveform control ■ Waveform control applied

Uninterrupted printing solutions

Continuous operation support pack minimizes the downtime

The Nozzle Check Unit (NCU) detects nonfunctioning nozzles and automatically cleans them. If the nozzles fail to operate after cleaning, defective nozzles are replaced by non-defective ones until a technician arrives, and printing is continued. This feature enables uninterrupted print operations and continuous productivity.

Ultimate design for usability ensuring high-quality production

New printhead allows printing on various types of textile

While printing on raised fiber surface textiles, a high head gap setting is required to prevent contact between the printhead and the nap. In conventional models, such gap conditions reduce the accuracy of ink droplet placement. However, the new printhead ejects ink droplets at a high speed to maintain the straightness of the droplet direction, and accordingly accurate ink droplet placement is achieved. This enables high-quality printing on napped textiles. (Recommended head gap : 3mm)

Reliable textile feeding mechanism ensures stable printing

Tx300P-1800 MkII can detect automatically changes in tension caused by media roll diameter varying to adjust the tension with a tension bar. Since the tension of media is kept constant, the textile feeding is stable even in high-speed printing and long-length printing to contribute in high-quality printing.

Standard features of MBIS3 and UISS deliver continuous printing for a long time.

Large two liter ink packs are installed in MBIS3*1 for long-time continuous printing to reduce operating cost. As soon as one ink container is empty, UISS*2 automatically provides ink from another container without any interruption to printing.

These systems supply ink continuously to ensure unattended continuous printing.

*1 MBIS3: Mimaki Bulk Ink System3
*2 UISS: Uninterrupted Ink Supply System
*3 UISS functions with 4-color operation.
