Flexaible and scalable future-proof solutions

A Fiery Software Maintenance & Support Agreement (SMSA) included for the first year with your Fiery purchase, provides phone support and an ongoing stream of software releases, including the latest device drivers, plus all minor and major product upgrades.

The modular software architecture allows you to add options such as additional printer drivers, advanced color features and production functionalities to grow according to changing business needs. Contact Fiery or your local reseller to purchase options listed below.

Color Profiler Option	Provides ICC-based tools for professional creation of ICC and device link profiles based on the renowned Fiery Color Profiler Suite.
Cut Server Option	Offers a comprehensive cutting solution that can drive more than 2,100 vinyl cutters and routing tables from industry-leading manufacturers.
Cut Marks Option	Completes and speeds up the production process by supporting all industry standard cutting and finishing marks and methods.
Color Verifier Option	Verifies the accuracy and repeatability of printouts through measuring and comparing color values against industry or in-house standards.
FAST Processing Option	Accelerates job processing by an average of 6 times and up to 13 times helping printers to run at capacity to maximize printer investments.
Ink Saving Option	Reduces ink consumption and ink cost while maintaining optimal image quality and color fidelity.
Printer Driver Options	Printer Options support a wide range of more than 2,400 inkjet printers from various printer vendors.
ES-3000	Fiery's M0, M1, and M2 compliant single pass spectrophotometer for Fiery output calibration, profile creation, and optimization.
